A COUPLE OF ILLUSTRATIONS OF WHAT I LIKE

After looking at more than a thousand AI-generated logos from three different logo-making platforms, here are two that have features that I like, though they are not exactly what I want. I am looking forward to reviewing the designs you develop!

What I like about this one: the colors; the stylized people in the upswell of water, the flowing stream
What I don't like about this one: I don't know . . . maybe it's too stylized?; it looks AI-generated

What I like about this one: the colors, the flowing stream, the circle (which indicates collaboration – a key focus of this company)
What I don't like about this one: It's not distinct enough from the logos of a lot of other water-related organizations. It needs something more . . . I don't know what

Please do not restrict your design thinking to these concepts. You might come up with something completely different that fits the bill. Thank you!
