

Brand Manual

(Revised January, 2016)

The SPEEDVEGAS brand started in 2011. when Tom and I developed the dream for the world's most thrilling driving experience. I believe our brand is an extremely valuable asset which can generate substantial success for all involved with it.

Therefore, we have created this brand manual. Like any manual, its objective is to help people who use the brand to understand its history, the brand values, and the best ways of getting the most out of it.

This brand manual is written for the benefit of team members within the SpeedVegas family, or partners who want to use the SpeedVegas brand to bring exposure to the brand.

A brand is always evolving, and people's perceptions of it change over time. However, there is strength in unity, so sticking to our identity is a good idea for everybody.

I want you, as a team member or partner to have a clear understanding of how we do business, how we communicate, what we believe in, and ultimately where we are going.

Enjoy the ride.

The logo is at the heart of all communication aimed at the consumer.

The word “SPEED” should always be in black or white.
The word “VEGAS” should appear in our brand yellow.

No other color variations should be used. This helps consumers consistently identify us.

typefaces

The Proxima Nova font family plays an important part in building our brand. Its bold, confident and distinct appearance makes it recognizable.

The **Proxima Nova Regular** face serves as the communication font.

The **Proxima Nova Bold** and **Proxima Nova Black** font treatments are used for headlines.

No shading, outlines, or keylines should be used.

PROXIMA NOVA BLACK

USED FOR HEADLINES

**More Comfortable Than
Being Stabbed.**

PROXIMA NOVA REGULAR

USED FOR BODY COPY

The air conditioning in a Lamborghini is like an asthmatic sitting in the dashboard blowing at you through a straw.

PROXIMA NOVA BOLD

USED FOR HIGHLIGHTING WORDS IN BODY

**Having a Aston Martin DB9 on the drive and not driving it is a bit like
having Keira Knightley in your bed and sleeping on the couch. It's not
going to happen.**

line height

Body copy must be displayed with a line height equal to 120% of the font height. This improves readability and lends an airy feel to our communication.

CORRECT: 120%, 1.2

Now let me be clear. Now, many of these plans will cost money, which is why I've laid out how I'll pay for every dime - by closing corporate loopholes and tax havens that don't help America grow. For part of what has been lost these past eight years can't just be measured by lost wages or bigger trade deficits.

borders & lines

Borders and horizontal rules may be used in conjunction with the brand to separate sections or to frame visual elements.

Our web presence is an important way for people to identify our brand.

The home page is designed to communicate four important concepts in 15 seconds:

- The experience is in **Las Vegas**
- You can **choose your own car**
- You can **choose the number of laps**

Other pages on the site communicate secondary themes of trust, safety, convenience, and value.
