

## Who we are.

### K9 MILL RESCUE (K9MR)

was founded in June 2014 by three friends with the same passion to help breeding dogs in crisis. New laws and the overall education of the public about the treatment of mill dogs has resulted in an increase in the number of discarded dogs. Our goal is to rescue the unwanted breeding dog before they are dumped at our shelters, turned loose into our open spaces, mistreated or destroyed. K9MR works to provide the physical, mental and emotional care each individual dog needs to transition into a family forever home.

K9 Mill Rescue will always strive to heal the sick and injured, rehabilitate the neglected and abused former breeding dog. All of our dogs are spayed or neutered to end their contribution to overpopulation crisis in our communities. Our volunteers shower them with unconditional love and understanding until we find the perfect family or rescue. K9MR is foster-based only; we do not have a physical shelter or facility.

## How we do it.

### WHERE DO THE DOGS COME FROM?

K9MR works discreetly and directly with breeders to rescue dogs from crowded, unsanitary, breeding living situations. We do not accept owner surrenders or pull from shelters. Our goal is to rescue discarded breeding dogs with the purpose of providing them the chance at a healthy, cage free life!
