**WHO Recommended & FDA Approved**  
**Safe & Effective for all age groups**

Bug Off is a clinically proven brand of personal insect and mosquito repellents that offers complete protection from mosquitoes, chiggers, ticks, gnats and bugs. Formulated with DEET and Natural Citronella extracts, **Bug Off offers guaranteed protection from mosquitoes that causes MALARIA, DENGUE, CHIKUNGUNYA, WEST NILE VIRUS & other mosquito borne illness.**

Both Children and Adults are prone for mosquito bites while outdoors including day time and night time. By applying Bug Off, people can repel mosquitoes by masking their sweat odor that attracts the biting anthropods.

### **How does Bug Off Work ?**

Bug Off contains DEET, an active ingredient invented by US Army in 1950's. DEET masks the sweat odor emitted by humans and thereby inhibiting mosquitoes to detect the targets. This makes Bug Off a very safe mosquito repellent since it does not kill any insect and rather irritates them.

***“ Gold Standard in Mosquito protection for the last 60 years”***

**DEET based mosquito repellents have been used for more than 60 years with 8 billion human applications.**

**SHELF LIFE : 2 Years**
