Whether your was built 3 years or 30 years old, the odds are, we have new technics today that can help improve your comfort and your energy efficiency. Bremen Solutions offers the Bremen knowledge and experience in energy efficiency/building science to homeowners of existing houses. By using the same diagnostic testing equipment used in new construction, information can be gathered to determine the most cost efficient method to making existing homes more comfortable and more energy efficient. Taking today's technology to existing home, Bremen Solutions offers "Comprehensive Energy Retrofit." For more information about energy efficiency improvements for existing homes go to [BremenSolutions.com](http://BremenSolutions.com).

Bremen Solutions will work your electric company to make sure you get benefit of all the rebates and energy efficiency programs they have available.

Do not buy or sell an existing home without have an energy efficiency audit.

If you are trying to sell an existing home, you are competing against newly built homes. Set your home apart from the pack by offering today's energy efficiency technologies with yesterday charm of an older home.

You do not know the true cost of a home without knowing how much it will cost you to heat and cool the house. When you order a home inspection to check the structure and roof of the house, call us to perform an Energy Audit and Inspection.
