

VIDSTREAM MEDIA

- Integrate an online “media player button/arrow” into the Ds, so that they look like those letters and also at the same time look like a media player button, such as these examples below.
- Capitalize or enlarge the V and S in VidStream, and the M in Media. The above example shows all letters in caps, but it’s also ok to have lower-case letters so long as the V and S in Vidstream and the M in Media are in caps.
- Letters in the logo design should match well with a widely available font, such as the fonts that are available in a standard version of Microsoft Word. Please identify the name of the specific font that it matches with.
