

## Save money on your building communications requirements

Ignite Broadband provide apartment building communications solutions at a fraction of the upfront price offered by electrical contractors.

We can install high speed data cabling that can deliver broadband and phone services to occupants of the building, at speeds similar to the NBN of up to 100Mbps. No need to pay NBN or Telstra to have the building connected.

Access control, intercom systems and communications lines to lifts and fire are also our speciality. We can even provide broadband and voice services for free, with no ongoing cost, to the management office of your next building.

Stop spending \$1000's with electrical contractors for your buildings communication needs and call Ignite Broadband today for an obligation free quote.

- ♦ Save \$1000's compared to Electrical contractors
- ♦ Save \$1000's not connecting to the NBN
- ♦ Total communications solution provider
- ♦ Phone and broadband access
- ♦ Access control, CCTV, alarm and lift line
- ♦ Broadband speeds of up to 100Mbps
- ♦ Same day connection for new occupants
- ♦ Attractive rates and plans for occupants
