

AMP SOLAR GROUP INC.

"Innovative Solar Power Solutions"

PREMIER SOLAR DEVELOPER AND RELIABLE BUSINESS PARTNER

AMP Solar Group Inc. is a leading developer of solar energy assets. We have a singular mission of developing investment-grade operating assets. We currently work within Canada and the US, with a view of expanding to global markets where our unique approach can provide differentiation to the market.

AMP develops, finances, owns and operates large roof mount and utility-scale ground mount solar power plants designed for on-grid or off-grid renewable power generation.

The company was founded in 2009 and has quickly become one of the most reliable renewable energy developers in North America. AMP has partnered with several large equity funds, including The Blackstone Group, with the objective of developing over 400 MW of solar projects in North America. The differentiated development and technical competence of AMP is based on numerous constructed and operational plants as well as knowledgeable and dedicated professionals.

The AMP team includes some of North America's top project development specialists, engineers, project managers as well as M&A professionals with global finance expertise. Together, we leverage the skills and experience to ensure that large-scale projects are developed in a cost effective, responsible and timely manner, while financed with the most efficient cost of capital.

PROVEN INTEGRATED FULL-SERVICE DEVELOPMENT PLATFORM

AMP's development platform provides bankable technology leadership, strong global financing competency, and an ability to develop, construct and commission projects promptly.

POSITIONED TO EXCEL IN A CHANGING LANDSCAPE

The solar landscape is rapidly evolving. With AMP's experienced people, established development platform and access to abundant and low cost capital, the organization will continue to provide what customers are progressively demanding:

-  Integrated and accelerated solution delivery
-  Guarantee of project delivery
-  Fully bankable solutions and partners
-  Full & transparent financing
-  End-to-end solutions for the life of the asset

SOME OF OUR MOST RECENT WORK

AMP provides a complete end-to-end service for solar power installations from large roof mount to utility-scale ground mount solar power plants. The group has numerous systems in operation that are yielding secure revenue streams under Ontario's FIT program.

The one-stop service provided by AMP includes project due diligence, yield forecasts and profit reports, system configuration, project planning and installation to operational management, regular maintenance, monitoring and optimization.
