

Layer 10 Consulting

Digital Workspace Enablement

Digital Workspace Enablement

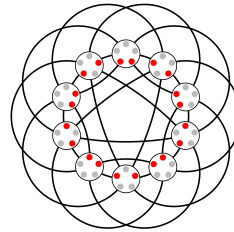

***Technologically Enabling
Your Workspace to
Foster Community,
Creativity and Culture***

Digital Workspace Enablement

Design

- Represent IT in design meetings and discussions
- Work with design team(s) to incorporate IT needs
- Assist in planning for IT dependencies from other areas (network connections for HVAC, security, etc)
- Manage the development of IT-related deliverables
- Present opportunities to leverage the latest & smartest technologies
- Lead IT-related vendor selection processes

Build

- Represent IT in construction meetings, floor & punch list walks
- Manage IT-related vendors
- Manage implementation of IT infrastructure (racks, cabling, fiber, network gear, etc)
- Manage implementation or move of IT desktop hardware (phones, computers, printers, etc)
- Manage the completion of IT-related build components (IDFs, server closets, etc)

Launch

- Manage the physical move of IT assets
- Manage end user issue resolution for IT items during warranty period
- Establish and manage request process for IT enhancements
- Facilitate transition to existing operations
- Represent IT in construction project close-out activities

Across All Phases, Layer 10 will act as the single point of contact for IT-related items, maintaining project documentation and communicating status, risks and issues to key stakeholders through the build.

Marketing Taglines

IT enablement of workstyles and lifestyles.

Creativity - Connection - Culture

Making IT a key differentiator in your space.

*What is the work/life style of your
employees/tenants/residents? And how does IT
support that?*
