# CORE's open-standards based platform provides a build-your-own decision tool capability to drastically reduce your "analysis to action" timeline

With CORE...

You can rapidly build-your-own decision support tool

Clients can select from a menu of independent pre-built modules that can be combined to target key answering questions.

1. Choose from any of our blueprints to drive the assessment

2. Select modules to target your optimization focus areas

3. Customize the visualization experience

CORE Toolkit
