

- Publish with one-click using our Excel Add-in.
- Calculation logic in Excel is automatically converted into an industry standard web service.

- Manage subscriptions to your models via an interactive web portal.
- Track usage of your models and associate with a pricing model.

PRODUCT INFO

iMpress has been developed to enable firms that create Excel-based financial and numerical models to publish them securely and reliably without the need for a complex software development project.

The process of managing versions of each model and how they are consumed has been simplified in order to make support and maintenance easy.

Our hosting platform is designed to scale according to the needs of your subscribers, ensuring reliable and responsive performance 24/7.

Get Started

1

Create an account at www.impress.today

2

Download and Install the Impress Add-in for Excel

3

Build you models and publish to our Cloud Services
