HI all,

I realize the files I attached are in Thai. However, there are elements in the PDF files that are in English and that I think you can gather elements regarding the purpose/objective of the business. For better understanding, I've prepared some additional resources for you:

About our Province

- Name: Samut Sakhon
- Our province is one of the smallest in Thailand (ranked 72 out of 78).
- However, our GDP ranks 6th in the country. This is because we have traditionally been a very industrial city. Factories here work around the clock.
- Meaning of "Samut Sakhon"
  - Samut = Ocean
  - Sakhon = City
  - So literally our province's name means: Ocean City
- So we are very famous for Seafood. Food processing. Food export. Every year we have a seafood festival.
- Our harbor is the first harbor where Chinese immigrants landed in Thailand.
- We are the first province with local government that was installed by King Rama V.

Smart City:

- https://en.wikipedia.org/wiki/Smart_city

TOD:

- http://www.tod.org/

Form Based Code:

- http://formbasedcodes.org/definition/

LEED-ND:

- http://www.usgbc.org/articles/getting-know-leed-neighborhood-development
- http://www.usgbc.org/sites/default/files/LEED%20v4%20ND_04.05.16_current.pdf

Videos:

- This video is the father of this Govt-Private city development model. They are the first province in Thailand develop this model and start working on developing their own city (https://vimeo.com/164375846))
- Phuket followed suit (https://www.youtube.com/watch?v=mGAYks0kwTA). In future when you come to Phuket you will see a completely new city.

We are doing the same thing at our own province, Samut Sakhon.

OK. I hope this helps.

Kim
