

These two are previous logos I designed but i do no longer have these in an AI format.

If you could UPDATE AND RENEW these designs but add some sort of abstract pattern within the twists and both left and right borders.

Or if you think you can keep the logo shape but change the whole of the inside into something more entertaining/eye catching for example the soul2soul image then that will be fine. I would preferably want to keep the name in the same spot but that isn't a priority.

This is a logo that i like due to the style of the image in the middle.

This is another logo enclosed logo i like, I also like the border patters on the inside and outside.
