LOGO CLEAR SPACE

To preserve the logo's integrity, always maintain a minimum clear space around the logo. This clear space isolates the logo from competing graphics elements such as other logos, copy, photography or background patterns that may divert attention.

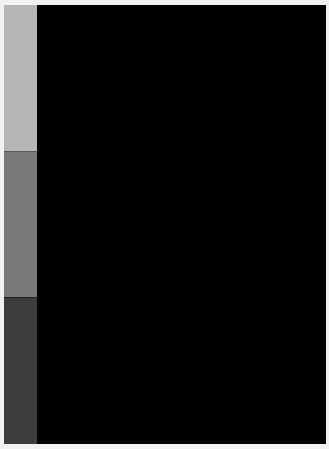
This minimum space should be maintained as the logo is proportionally enlarged or reduced in size.

COLOR VARIATIONS

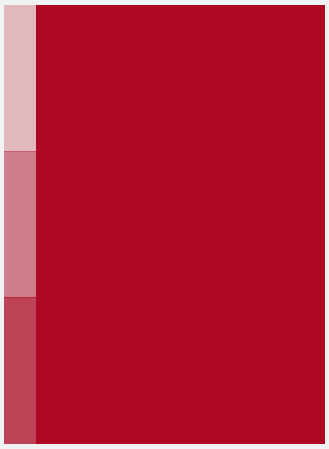
To preserve the logo's colors always reverse the any matching background colors.

PRIMARY COLORS

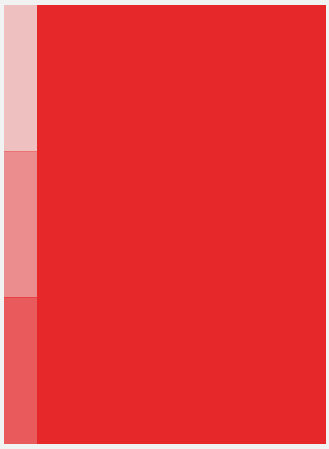
To the right youll find the colors used to develop your logo brand.



Black
RGB: 0, 0, 0
HEX: #000

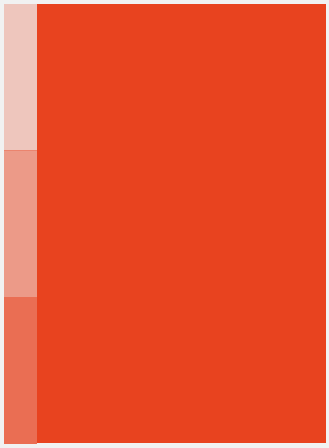


Red
RGB: 173, 9 34
HEX: #ad0922

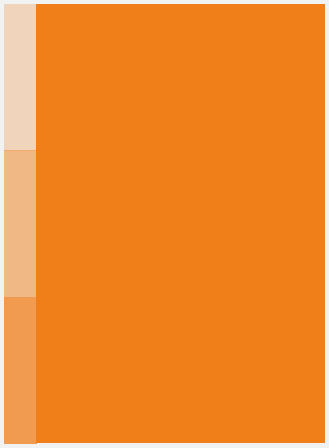


Orange1
RGB: 230, 40, 42
HEX: #e6282a

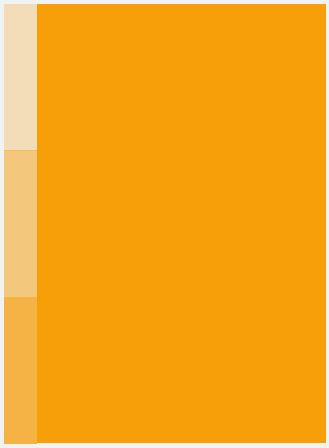
Tertiary colors are not fix colors. These are just suggestions in order to make primary colors standout. Could be used as accent colors.



Orange2
RGB: 232, 67, 31
HEX: #e8431f



Orage3
RGB: 240, 127, 25
HEX: #f07f19



Yellow
RGB: 246, 159, 9
HEX: #f69f09

To the right youll find the fonts used to develop your logo type.

Some modifications might have been done in order to match the logo icon.

TYPEFACES

Plateia Bold

AaBbCc

Lorem ipsum dolor sit amet, ex tota scriptorem ius, id dicunt mandamus mei. Utinam sapientem disputando vim ad, cum cu vitae facete, eum quem dolores ea. Vis zril alterum expetenda no, has in assum fastidii, eam quodsi legendos ne. Ius eu admodum honestatis, vim quem dicunt tey.

Zeronero Black

AaBbCc

Lorem ipsum dolor sit amet, ex tota scriptorem ius, id dicunt mandamus mei. Utinam sapientem disputando vim ad, cum cu vitae facete, eum quem dolores ea. Vis zril alterum expetenda no, has in assum fastidii, eam quodsi legendos ne. Ius eu admodum honestatis, vim quem dicunt tey.

LOGO FILE FORMATS

AI File

Fully editable stationery design master file. Professional logo designers use vector drawing tools like Adobe Illustrator to create logo designs and not raster drawing tools like Adobe Photoshop. We also use Adobe Illustrator for stationery design as that is the industry standard for printers.

EPS

This is your fully editable master file that all the other file types are created from. You need specialist software to work with this file called Adobe Illustrator. The eps file is fully editable with the fonts flattened.

PSD

This file format is used by professional designers and is the native file format of Adobe Photoshop. You need Adobe Photoshop to open this file type. We supply it with a transparent background too so it is great for use by a professional web designer.

JPG

These file types are all used for home/office printing in applications like Word or PowerPoint (you import the image into your document).

PNG

A fairly new arrival on the scene. It is a web site file format supported now by most web browsers. The beauty of this format is that the quality of finish is usually high. The PNG file format also resizes much better than Gif files. Request this format on the order form should you require it.

PDF

The main advantage of a PDF file is that you can view a high-resolution vector-based version of your logo without having access to professional design software.
