

Let's guess:

You don't have an abundance of free time. And, you simply don't want to spend the little time you have – mowing a lawn and pruning the plants.

You would probably like to spend that time the way you should, instead.

Enjoying the sunset in the privacy of your garden, watching a favorite TV show while lying on a hammock, or throwing an occasional BBQ party with your friends and loved ones.

Right?

Visual: Can we somehow incorporate two images (the first one is picturing someone busting his/hers ass of in the garden during the heat; the second one is someone relaxing, watching the sunset in the garden, maybe surrounded by family members or friends)

**Getting an outdoor area of your dreams is not that difficult, nor expensive.
You can make this happen by getting a help from a landscaping company
that offers tailor-made services.**

Generic landscaping services:

- You pay for the bundle of services, regardless of whether you actually need them
- You get a generic service, not adjusted to the specific needs of your outdoor area
- The field team thinks of your property as just another task they have to complete

Tailor-made landscaping services:

- You pay only for the services your yard really needs
- You get your garden's specific issues solved, and specific requirements met
- The field team members take their time working on your property
- They get to learn all about your vision - and make it a reality

Visual: Just a neutral background, driving the attention to the text and table.

Why should you care that Landcrafters employs the leading industry experts and uses modern, eco-friendly technical solutions?

That is why we're able to transform your lawn into a green carpet and get your plants in a perfect health. All while keeping your vision and your budget on our minds.

That is why our services actually enable you to reduce the operating expenses.

Visual: Background photo of an amazing-looking lawn/garden.

Do you worry our services are going to disturb you while trying to unwind in the privacy of your own garden?

Our client service operators build a schedule around your needs – designed not to disturb you at all.

Visual: Portraying happy people/person relaxing in their awesome garden space.

More benefits of having a well-maintained yard:

In some cases, a great-looking lawn can increase your property's value up to 20%.

Your lawn and plants reduce the energy consumption – countering the warming effects of paved surfaces.

They act as giant dust filters, increasing air quality, and removing carbon dioxide from the atmosphere.

Visual: Maybe a neutral background, but adding icons above the three benefits.

At Landcrafters, we do more than just keeping your garden in pristine shape.

This is what some of our long-term clients say about our approach:

**“We are delighted with your landscaping, both with the design and implementation.
It’s not very often these days that work exceeds expectations.”**

**“Landcrafters are efficient, on-time, responsive, provide fair pricing, do outstanding
work, have great people, and actually follow up on their work.”**

Visual: Two photos of great front/back yards, trying to convey the yards belong to the two people who left us such nice testimonials.

Do our services have flaws?

Yes. They have two giant ones.

1. Your “new” garden will get all of your neighbors jealous.

2. Your friends will probably start inviting themselves over more frequently.

Visual: Just a neutral background, driving the attention to the text and table.

**So, what's the next step to enriching your living area?
And getting you a garden from your dreams.**

It's simple, just book a no-obligations consultation
