

## How much **money** can I expect to **save**?

It is hard to predict exactly how much fuel you will save due to varying factors such as driver ability, vehicle condition, road conditions, type of work, fuel quality etc.

However we have conducted a simple table below which shows potential fuel savings for a typical truck which burns 1,200 litres per week for 48 weeks annually at a price of €1.00 per litre diesel.

Average Savings per year	1 truck	5 trucks	15 trucks	30 trucks
8%	€4,608	€23,040	€69,120	€138,200
15%	€8,640	€43,200	€129,600	€259,200
25%	€14,000	€72,000	€216,000	€432,000
