Door & Dock Consultants Here To Help You:

- Prioritizing the many, many...repairs & needed replacements.
- Preparing a budget plan to tackle highest priority items.
- Preparing for audits
- Selecting the best solutions on new product: We partner with most every manufacturer on the market.
- Service & repair of broken down door & dock equipment
- Cloud-based SafeDoor Preventative Maintenance tracking system for detailed safety compliance reports & follow up work tracking.

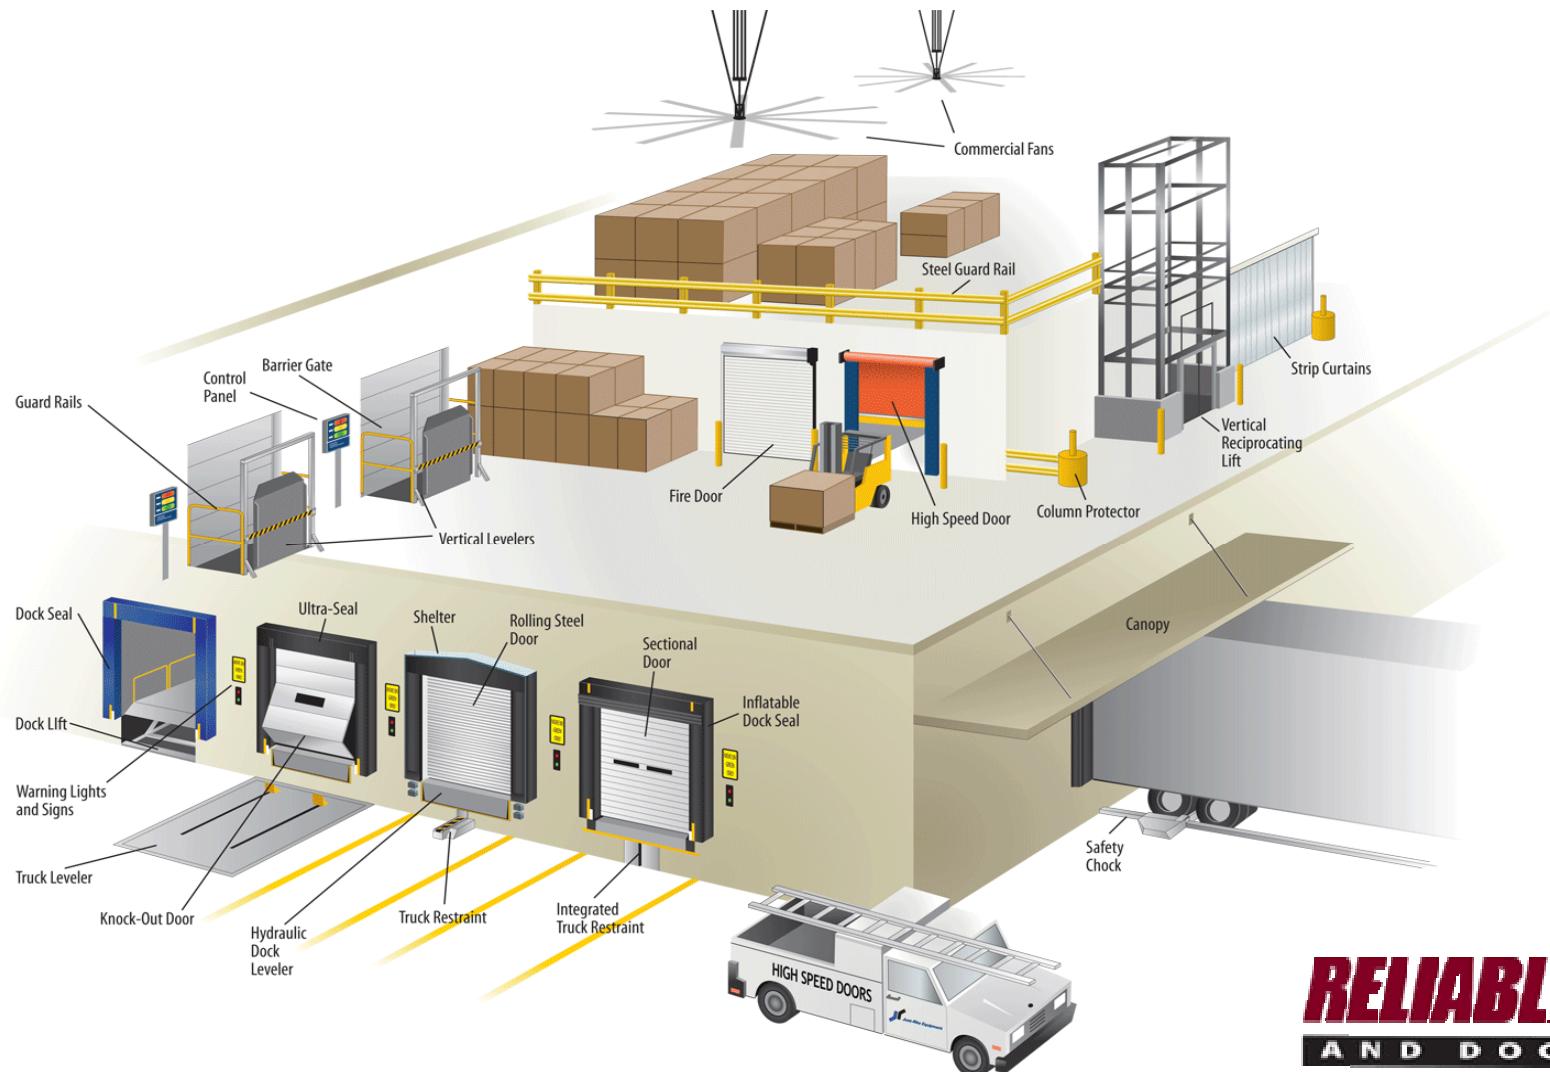

RDD's SafeDoor PM Program Makes You and Your Organization:

1. Safety compliant by properly maintaining your equipment, preventing many of the common hazards created by neglected doors & docks & compliant with OSHA safety standards!
2. More cost effective & productive by preventing many of the common breakdowns that result in costly service repairs & from the many costs associated with people getting injured on the job.
3. Highly organized: Detailed inspection reports are cloud-based & include a detailed asset report, safety compliance report, and most importantly a follow up report with pictures to support recommended repairs.
4. Follow up work easily tracked in an app designed to show whether follow up work is completed or still outstanding.

HOW DOES IT WORK?

Step 1: Select all assets for the SafeDoor PM program:

RELIABLE DOOR™
AND DOCK, INC.

Step 2: Assign all assets a unique ID # & scan-able QR Code:

USED FOR Asset Tracking & Reports:

- SAVE ON HEADACHES: Repair follow ups & close outs
- SAVE ON MISTAKES: Accurate reporting & door identification
- SAVE TIME ON RECORDS: Historical records (PMs & follow up repairs)
- SAVE TIME ON BUDGETS: Budget planning based on variables of assets
- SAVE TIME & MONEY ON SERVICE & REPLACEMENTS: Asset detail referencing sizes/manufacturer's information & future replacement quotes

Wicked awesome organization at your finger tips!!

Step 3: PM is performed & almost immediately you receive organized reports:

REPORT #1 Asset detail report

REPORT #2 Safety compliance report

REPORT #3 Summary report w/ recommended follow-up repairs with pictures to support our recommendations
