MADE IN KOREA

RETAPE is a professionally engineered, dynamic therapeutic kinesiology tape for all body areas. RETAPE provides support for injured structures without compromising a healthy range of motion. RETAPE can help with fluid movement because the elastic recoil of the tape 'lifts' the skin, which increases the space underneath to allow for lymphatic drainage that helps with tissue healing and speeds up the overall healing process. You can wear it in the shower and while sleeping so it's providing therapeutic treatment 24/7.

POWER TO BE YOUR BEST
