This paragraph will replace with
the comparison between granite &
quartz

Q Premium Natural Quartz is a natural quartz surface made by an optimal fusion of more than 90% quartz and resin materials. Quartz is naturally beautiful yet incredibly durable. Treated and pressed, natural quartz stone is one of nature's hardest minerals. All slabs are available in 2cm & 3cm. For more information visit www.qfrommsi.com.

THE Q™ ADVANTAGE

ENDURING CRAFTSMANSHIP

- #1 in performance among all countertop surfaces
- Engineered with optimal fusion of quartz and resin
- Limited Residential Lifetime Warranty
- Q™ Premium Natural Quartz is manufactured using internationally patented Bretonstone® system of Breton S.p.A., Italy, as well as state-of-the-art manufacturing systems across the globe

EXCEPTIONAL DURABILITY & SAFETY

- 99.9% solid, non-porous surface provides superior stain, scorch, scratch, and chip resistance
- Impervious to bacteria and other microorganisms
- NSF certified

ENVIRONMENTALLY RESPONSIBLE

- GreenGuard Gold certified
- Member of the US Green Building Council

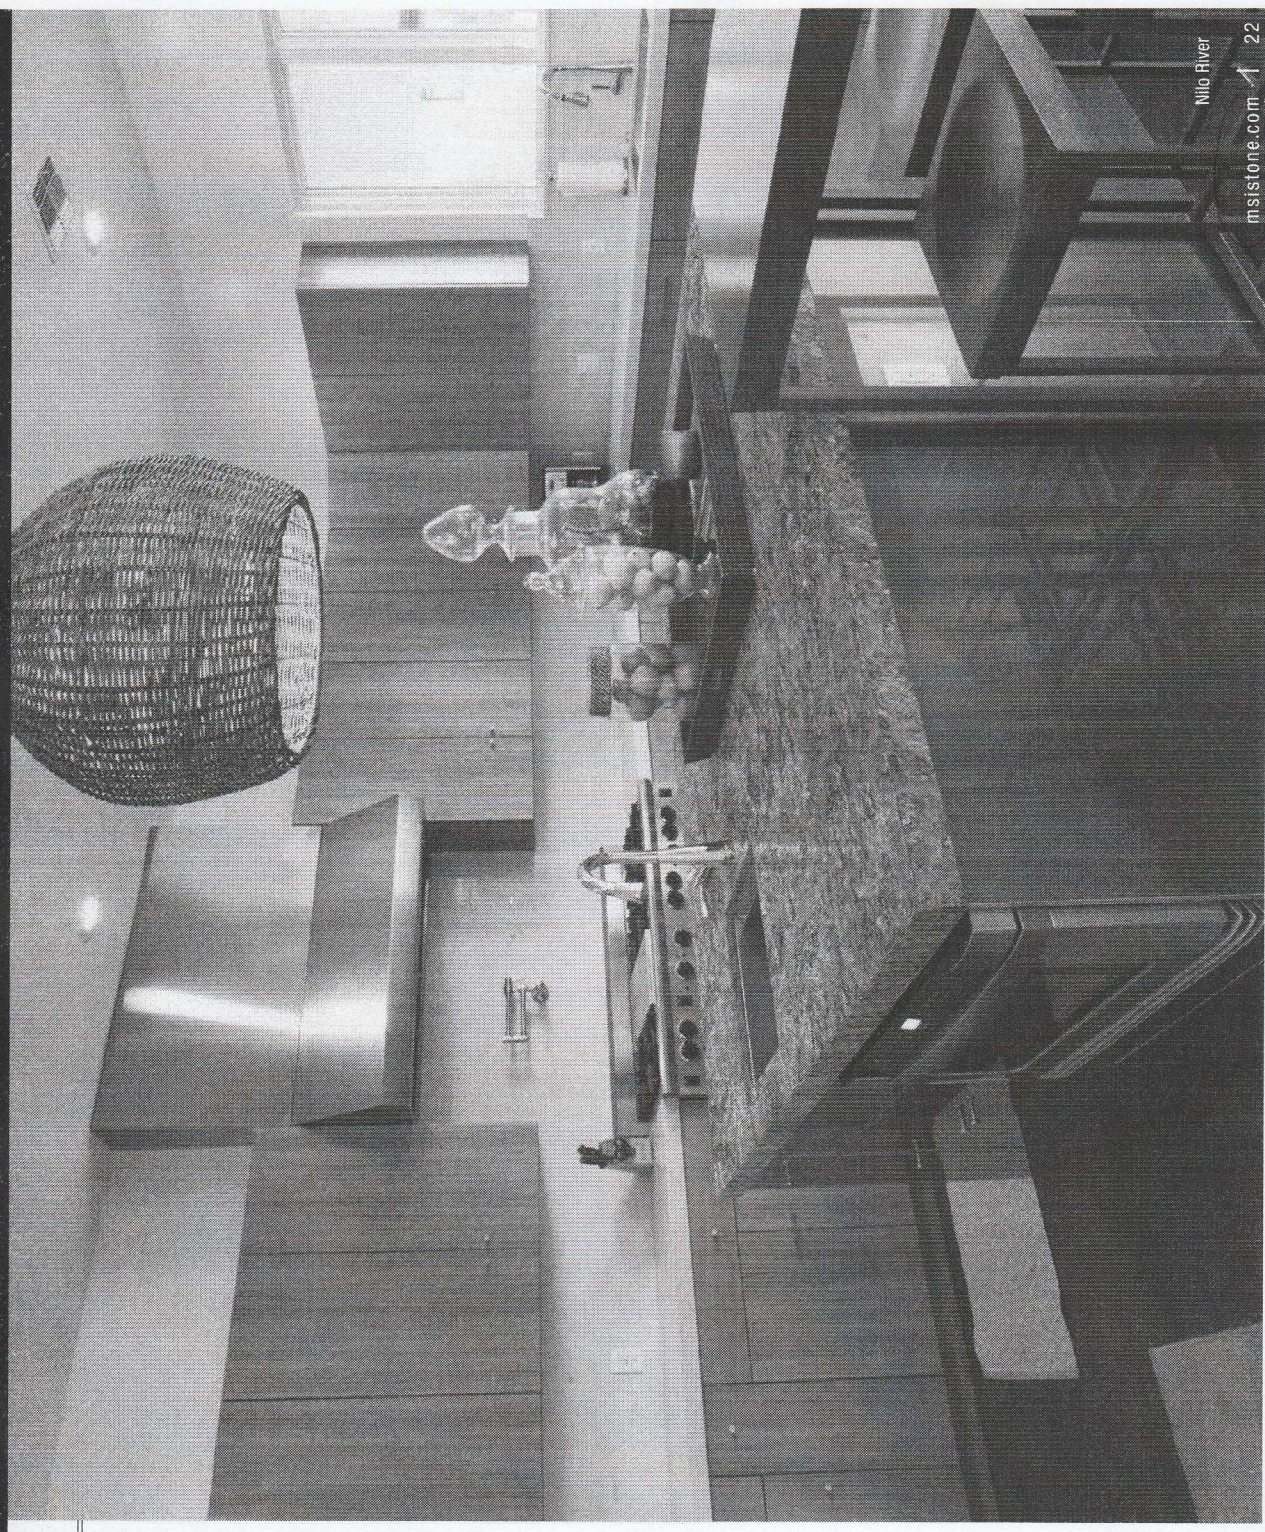

Manager: 10/1/2010

- SLABS & COUNTERTOPS • NATURAL STONE • PORCELAIN & CERAMIC • DECORATIVE ACCENTS • HARDSCAPES
• Pre-fabricate Slabs • Natural Stone • Granite • Quartz

	Marble	Granite	Quartz	
Physical Attributes				
Melt Point (°F)	2,442	1,260	1,270	
Source	Nature	Nature	Human Made	
Hardness	4	6	7	Quartz countertops are made by 93% natural quartz stone with 7% resin binder. This creates an extremely hard stone that is stronger than granite or marble.
Color Consistency	No	No	Yes	Each marble and granite is unique. If you use 2 separate pieces for island and countertop, you might experience the color difference. Black granite dyes change and the appearance of the counter may not be the same as you initially installed. Quartz is human made, and the color is consistent throughout the entire slab
Durability				
Scratch Resistance	Good	Good	Good	
Household Chemicals Stain Resistance (Wine, Vinegar, Soap, Mold etc)	Poor	Good	Good	Granite and marble are both porous stones. If you spill the wine on granite or marble, the wine can sink into the stones and potentially permanently stain the stone. Quartz is human made stone, and it never requires sealing. Quartz is very stain resistant.
Heat Resistance	Good	Good	Good	
Abration	Poor	Good	Good	
Maintenance				
Easy To Clean	No	Yes	Yes	It's easy to clean the quartz, compared to marble and granite. The quartz washes off with soap and water and looks as good as new.
Easy To Repair	Poor	Fair	Good	
Regular Maintenance	Yes	Yes	No	Granite and marble countertops must be sealed regularly (Once a year) to prevent staining. The maintenance adds to the cost of the countertops. Quartz doesn't require sealing or regular maintenance.
Value				
Price Per sqft	\$\$\$	\$\$	\$\$\$\$	Quartz is less expensive
