

HOME A

The option with the "star" is the recommended option. This option is fixed or always stays visible on the screen. You can swipe left/right to look at the rest of the options and compare it to the "recommended" option.

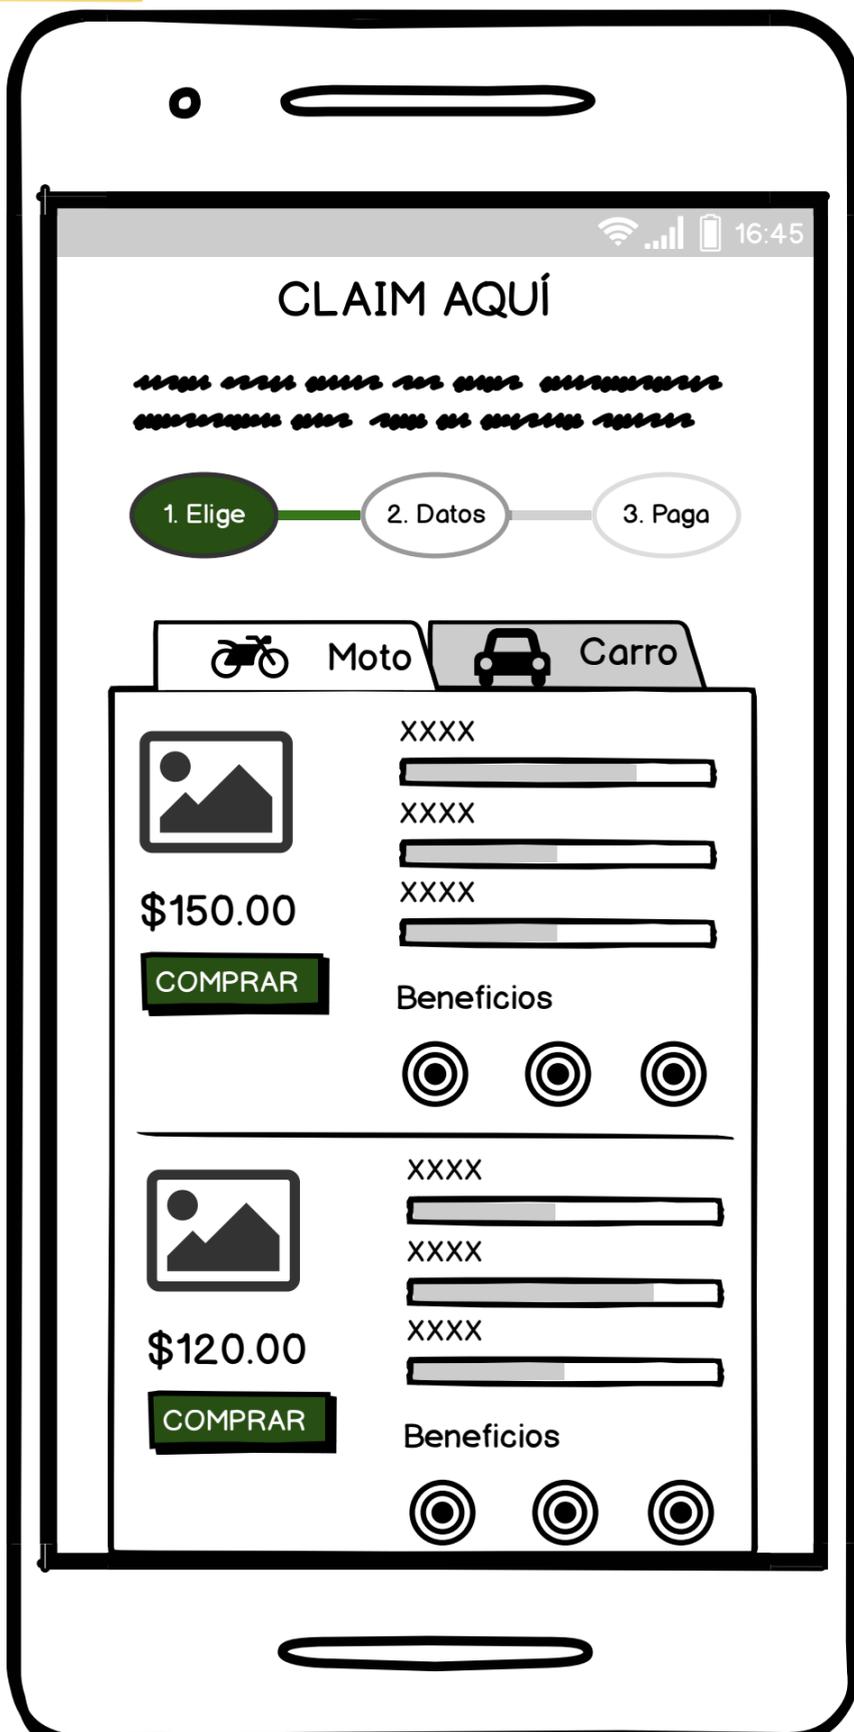

The XXXX represents the insurance coverage and the bar represents the limit. An insurance limit is the maximum amount of money an insurance company will pay you for a covered loss.

Some coverages show their limit by accident and by year. We would love to see designs where they incorporate only one and designs where they incorporate both.

Other benefits of the insurance policy...

 Nissan

The VIN or vehicle identification number is a humongous field consisting of 17 digits. Since the Vin is extremely long, we want to add a counter to give users a sense of control.

[a link](#)
 We would like to provide users with a link or Info icon where they can click and see where they can find their VIN in their papers and car.

Los últimos 6 digitos del VIN llevan solo números

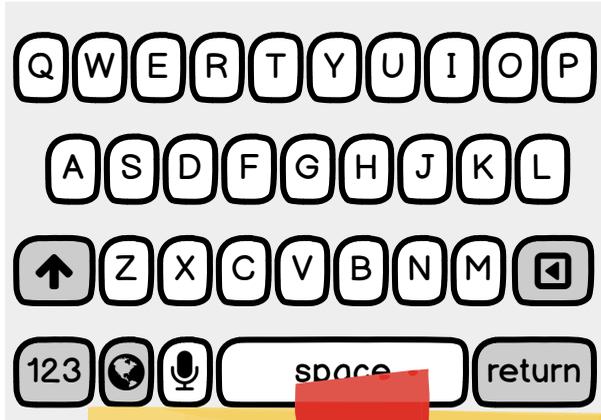

The VIN field should have some sort of dividing line between digits. They don't have to look exactly as this one though.
