

I like this layout **a lot** (not the typography) and the way the word is at angle. Maybe you could try have the word Growth at an angle (signifies growing) and then the words “The” and “Business” similar to this.

I like this style of stacking the words on top is good

I like the effect of putting 2 words together like this **GROWTHBUSINESS**

<p>I like the positioning of the wording here to incorporate the word “the”</p>	
<p>I like the green contrast of colours here that could be used to style the word “growth” or just the letter “g” or letter “o”. Im not restricting where/if this should be used</p>	
<p>The green pixel style could be an idea</p>
