

We are looking for a logo for a new brand in the Drone Racing scene.

The domain name is red-punk.com

What we are looking for is something that attracts a younger demographic, 15-35 years old, with a kind of a skater, 'bad boy' feel.

Also, the logo may have a touch of Steam Punk or Cyber Punk feel.

But it should be an iconic symbol instantly recognizable.

The logo should lend itself to T-shirts and other 'swag' that drone pilots are proud to wear.

Some logo ideas that we have played with:

And some logos that we like.

This logo might be interesting if some kind of 'FPV Goggles' could be added to it.
