Be careful with the difference of colors, here is grey concrete (texture looks like concrete). You can see next image

Color dark brown

The level is higher

Color dark brown and no wood

The level is higher

missing volume (edge) & concrete texture and color

missing volume (edge) & concrete texture and color

The walls is only between the houses and not on the main street. At the front is metal fence bars

Pilar & above are in dark brown. Check next picture, the original design. Be careful that at the top and at the bottom of the pillar it is white

The whole street is equally inclined. There is no angle

detail in graphite color

missing the edge

General remarks:
1) Be careful with the colors and the place of each of them. Note that the project includes white, concrete gray, graphite (dark gray) and dark brown.
2) Pay attention also to the areas where volumes must be applied and there are difference in sizes.
3) The colors applied to the unit 1 are applied to all the other units in this project. Follow the same instructions.
