

General comments:

1) Colors:

- the brown should be darker than that.
- the concrete gray seems like stones of different tons, needs to be more uniform.

2) Fence: kindly provide pictures without the fence because it covers the house facade; we need just few pictures with the fence, perhaps one is enough.

3) We would like to see a front perspective picture showing the four houses instead of cutting one of them as in this picture that we received.

\* Please see the original project (picture below) in case you have any doubt and do not hesitate to contact me if you have any question.

We need more natural effect:  
Cloud, people
