

The Haven at Tomales

ELEGANCE IN NATURE

Experience 1,000 acres on the California Coast nearly untouched by humans since gold rush settlers in the 1800s laid claim to the land. The Haven at Tomales is located on a family owned and operated private ranch, home to Purebred Angus cattle and a flock of sheep. The historic 1800's barn and terraced gardens have the most perfect views of canyons and one of California's largest Eucalyptus forests. The rolling hills, sweeping trees and sparkling ponds are a sanctuary for some of California's most beloved wildlife creatures, such as deer, quail and geese.

The family who oversees the ranch has a deep passion for nature conservation. They are committed to environmentally friendly and responsible, locally sourced farming practices. The land has been at the forefront of soil and riparian preservation practices. The focus has been on reducing carbon foot print to do our part in preventing climate change. We believe each piece of conservation is uniquely important to preserving our precious resources and know when put into practice together, they make an impactful difference.

Our hope is to partner with individuals who have a love for nature. The exclusive experience on this California coastal land is truly a rareness in the modern world we live in.
