

Liquid Light PORTRAITS

Information Pack

The Story so far...

My love of photography began when I was 15yrs old and as a result I now have a Degree in Photography and Graphic Design. Whilst studying I worked in hospitality and found I simply love being around people.

I left the hospitality industry a few of years ago to work in Childcare and became a Nanny. On many occasions I wished I had my camera so I could capture special moments, funny expressions and development breakthroughs the parents were missing out on!

That is when I had a lightbulb moment and decided I would start my own portrait business. Being able to combine my love of babies and kids plus my passion for photography was a dream come true. So join me on this new adventure, it will be fun.

My aim is to create simple, natural portraits for you and your family to love for a lifetime.

Newborn Session Info

Congratulations on your new arrival.

Thank you for choosing Liquid Light Portraits.

I'm so looking forward to meeting you.

Now is the time to capture your newborn, with her button nose and his tiny toes.

I have found it ***best to contact me when you are in your 2nd trimester of pregnancy*** so you don't miss out. This will be a ***tentative booking based on your estimated due date***. Once you and bub are home and settled in, ***I will wait to hear from you so we can arrange a suitable date and time for your session***. At this time I will also ask if you and your partner wish to be photographed with your new baby. This is totally up to you as I am aware you may not be feeling your best. If you do choose to, your welcome to bring along a couple of comfortable tops so you can be photographed with bub.

The ideal time to photograph newborn babies is around ***6-12days old***. Please bring your partner or close family member/friend with you as support prior to and during the session so you can relax and enjoy yourself. *Happy Mumma = Happy bubba!*

Newborn sessions are at my home based studio in Wakerley, Brisbane. Your ***newborn session*** can take awhile so I suggest allowing for ***2-4hrs*** and to ***bring h2o and snacks for you and your little one*** as breaks will occur during the session to feed and snuggle your baby. The studio setup is simple, with no harsh studio lights glaring at you, or to trip over. Just soft flattering natural window light and beautiful props and wraps for you to choose from as I love to involve you in the styling of your session.

Your ***Session fee*** covers custom-styled photography and your ***private online gallery***. Your private online gallery will display ***approximately 20 images*** each personally and professionally edited by myself. The session fee does not include any prints or digital negatives but will be deducted from any choice of collection you order. Interest-free payment plans are available, (terms and conditions apply), please call or email me for more details.

Family Session Info

*Many people ask me when is the best time to have family portraits, my answer is 'Anytime'?
Your family is the best it can be everyday which leads to my style of family portraits.*

Liquid Light Portraits isn't your run of the mill, out dated,"look at the camera and say cheese" family portrait studio. Liquid Light Portraits is all about being fresh and relevant in today's ever-changing world. I believe in simply stunning candid portraiture; it's not just about the 'WOW', it's about you and your family. I love capturing what you love doing as a family, where you love to go: it can be as simple as being at home reading a book or spending the day at the markets. *What's your story?*

This style of photography is called '**Life Style**' photography, it's all about you being you, with a smidge of direction and no glaring studio lights. The best part is you can wear what you like, bold colours and patterns are welcome, let the kids choose their outfits, let their personalities shine, just be mindful these photos will become your family heirlooms (trends tend to date an image eg. Dora or Transformer t-shirts).

During the **initial phone consultation** we will discuss your needs and talk about the type of portrait session you are after, as well as what collections and products you are interested in. At this point we can arrange the best time and date for all involved. The **Portrait session** will typically go for **1-2hrs** depending on the location and the age of the children, as the little ones can tire and require rest and a snack to re-boot.

Your **Session fee** covers custom-styled photography and your **private online gallery**. Your private online gallery will display **approximately 20 images** each personally and professionally edited by myself. The session fee does not include any prints or digital negatives but will be deducted from any choice of collection you order. Interest-free payment plans are available, (terms and conditions apply), please call or email me for more details.

The Stone Print

From \$195

(Excluding GST)

A piece of reclaimed Artware.

The Stone Print is a little piece of Australia waiting to be taken to its new home.

The Stone Print substrate is made from reclaimed raw materials that are up-cycled and repurposed to innovatively create a simply beautiful art piece. The mix of reclaimed timbers and stone composite with specialist UV inks result in a fine art quality image that is scratch and water resistant, has uninterrupted depth and, as there is no glass, no reflection. The handmade Stone Prints are an individual and distinctive alternative to canvas, paper or glass prints, each with its own character and charm.

Standard Sizes

15cm x 21cm = \$195

21cm x 30cm = \$275

20cm x 42cm = \$350
