

Screen 1

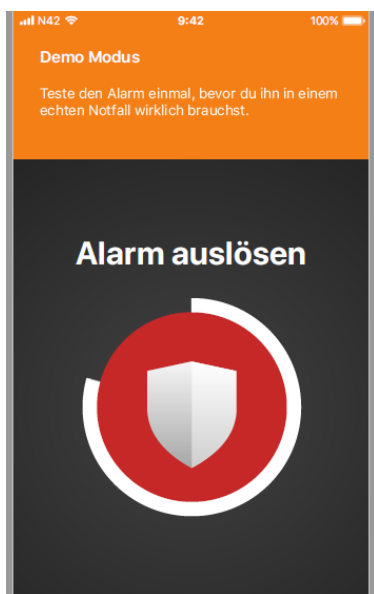

- Startscreen with the name: priority24 (we have no logo yet)
 - Claim: Weil Sicherheit Priorität hat!
-

Screen 2

- Registration with input-fields
 - Name
 - Vorname
 - E-Mail-Adresse
 - Schule
-

Screen 3.1

- AlarmScreen with Demo Info
- AlarmScreen, like this but this is an older version
- With longpress you trigger the alarm
- The Text above the button is „Schul-Alarm auslösen“
- Demo Text like in the screenshot

Screen 3.2

- AlarmScreen without DemoInfo
 - we need additional 2 symbols on this screen
 - message
 - settings
-

Screen 4

- alarm is triggered and a dynamic symbol z.b. a spinning wheel indicates that
 - on the bottom of the screen you can cancel the alarm within 10 seconds, there is something like a red text „alarm abbrechen“
 - we need additional 2 symbols on this screen
 - message
 - settings
-

Screen 5

- We need Screen 3.2 with a push notification that is on the top of the screen

Text: „**Sekretariat:** Bitte bleiben Sie wo Sie sind“

Just 3 simple howto Screens with e.g. a pictogram on the top and a text below and a colorful background e.g. yellow, green and red

Howto Screen 1

- It shows how simple the Registration is

Howto Screen 2

- It shows what happens when an alarm is triggered

Howto Screen 3

- It shows how you can trigger an alarm
