## Wise Sherpa programme options

Wise Sherpa has three different levels of programmes - Compass, Navigator and Guide - to cater for varying needs and budgets. Each of the programmes lasts six months where each participant will work with Wise Sherpa as a guide in one-to-one sessions to cover the five steps approach to successfully set up their business.

### We have three key measures of success for our programme alumni as a result of their participation:

1. Confidence: How well set up do participants feel for business success?
2. Time: The amount of time saved in transitioning and operationalising the business
3. Performance: How much more income can be identified as a result of the increased focus on building the business?

*We are also open to designing bespoke tailored programmes based on individual requirements.*

*We can also work with co-founders and have a particular interest in life-partners co-founding consulting/professional services businesses.*

### Additional specialist consultants and support

The Wise Sherpa has carefully curated an eco-system of associates and experts which is unique in this space. They can advise on specific areas where additional support may be required based on business objectives, experience gaps and needs.\*

\*There may be additional costs depending on the nature and volume of advice required.
