You have your HuExtensions installed and you're looking amazing! You're walking around looking like a movie star!! Only thing is you're not sure what to do with your extensions now that they've been installed. What are the things you can do at home to keep your HuExtensions looking great as the first day you got it installed? We're going to give you a few tips on how to maintain a great looking install so your extensions can last you a very long time.

TIP 1. PURCHASE YOURSELF A LEAVE-IN CONDITIONER

HuExtensions are **100%** Indian Virgin Hair. The quality is amazing, and Huetiful has a great light weight leave in conditioner that would work wonders. We prefer a water-based conditioner that won't weigh down your hair. Huetiful's light formula leave-in protectant spray is ideal as it also is used as a heat protectant from blow drying and heated tool styling by our stylists.

TIP 2. DO NOT USE HEAVY PRODUCTS

Because of our HuExtension's low porosity, do not absorb shea butter and heavy oils like our natural tresses do. So adding natural hair care products is not the thing to do for extensions. That also applies to shampoo and conditioners. It sits on the hair strands and weighs it down. It will also cause friction and cause the extensions to tangle. Stay away from oils and heavy hair care products. The less the better.
