OLD LOGOS

We like these designs and they are very versatile. We do not like the trees or the dot in the 'O'. The font is just okay.

LOGO - 3 alts

These are first versions of the two above however, we don't like the colors or font in these. The font for 'resort & marina' is okay.

These are variations I redesigned to create something closer to what we like and test the versatility. Again, not a fan of the trees and unsure about the font but we like where these are headed. Interested in seeing this with different versions of waves.
