Make the body part the kids names in the red, black, yellow colors for the fonts, like the previously uploaded snake picture. No background color - just the fonts are colored and the edges of the names create the shape. In other words, no actual outline on the snake body - just the names. Yellow color font will probably need a black outline on the font to make it stand out.

I'm sure you can do better on the tail - this was just for example. Can you make it say 2019?
