

# Private Label Cleaning Products

### **Introduction**

Filling Factory was started in 2015 as a division of Eco Touch, a leading manufacturer of automotive appearance chemicals. The concept behind Filling Factory is to allow clients to create their own brand of cleaning products using our highly effective and safe formulations. From our beginnings we have branched out into the automotive, household, marine, and speciality cleaning markets. We have a wealth of experience with regards to formulations, packaging, and branding, which is sure to make your project with us a success. Whether you are a retail store, car wash center, franchise, independent detailer or entrepreneur, we can give you a customized product line to fit your needs.

### **Formulation Standards**

Our products are formulated to be safe, effective, and match the performance characteristics our clients desire. We rely on a blend of both natural and synthetic materials. The majority of our surfactants and solvents we source are from the EPA's CleanGredients database which helps us identify the safest and most effective ingredients on the market today. Many of our products are also EU REACH certified.

### **Our Facilities**

We are located in Dover, NH about one hour north of Boston, MA. All the products are blended and manufactured by our trained staff of manufacturing experts. We abide by the FDA's GMP (Good Manufacturing Practices) and take every measure to ensure the quality of our end product meets or exceeds your expectations.

### **Packaging Options**

We have access to a wide range of packaging options for you to choose from. Many components are warehoused for faster turn-arounds. Others can be sourced for you on demand.

### **Performance**

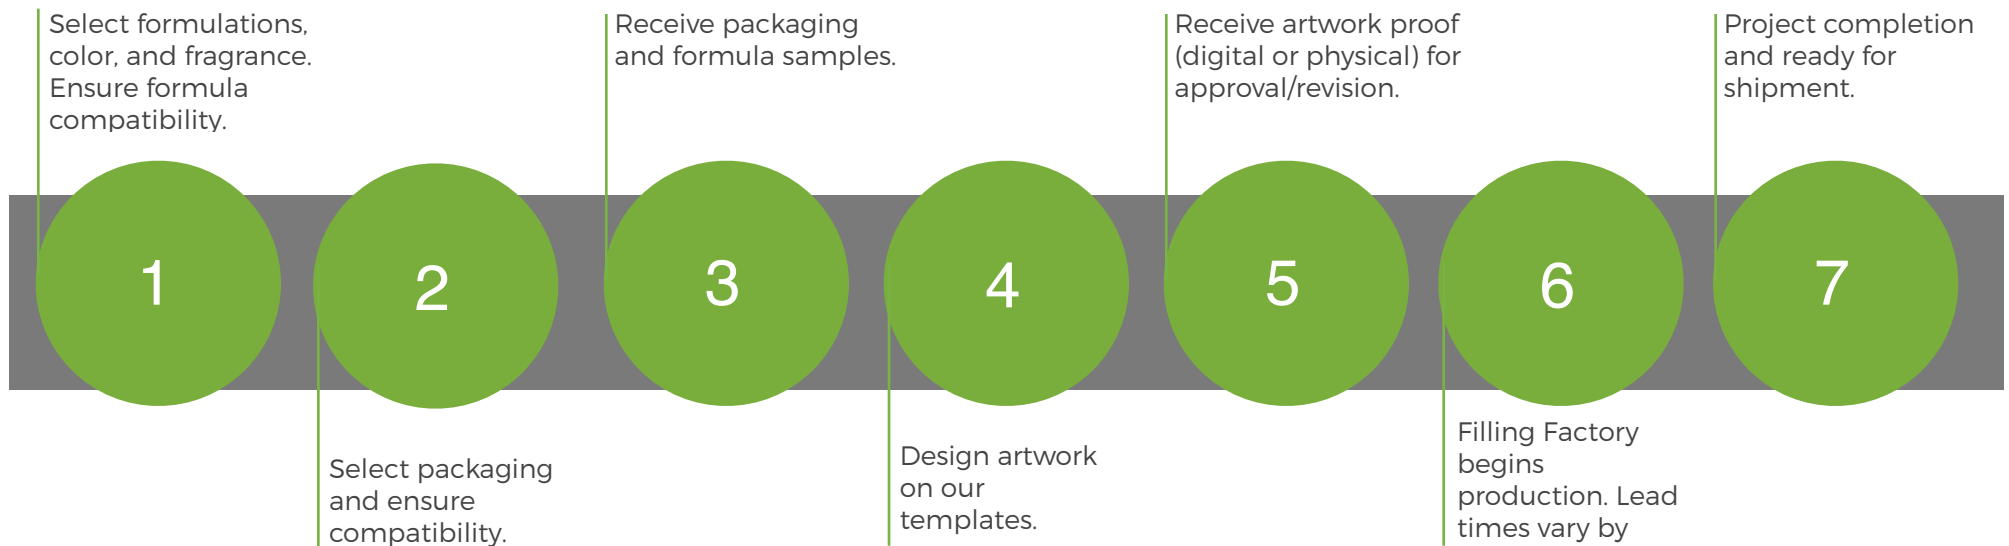

Our products have undergone years of market testing by real consumers. We pride ourselves on formulas that rival brand leaders. In addition we can benchmark to any specification you require.

## Filling Factory products are manufactured with rigorous quality control measures.

- Strict environmental and operational processes
- Abide by the FDA's GMP (Good Manufacturing Processes)
- Filling Factory's parent company Eco Touch is Certified by Green America

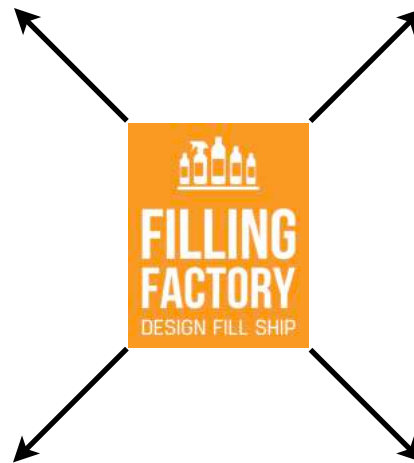

### Amazon FBA

We work with many clients who re-sell their brand within Amazon. Our staff can help guide you through the various packaging and shipping requirements.

### Kitting and Assembly

We can kit various products together in poly-bags, boxes, or shrink wrap. Just let us know what you're looking for!

### Graphic Design

We have partnered with a local graphic design company who can assist you in branding, artwork, and design.

### Custom Formulations

Customize the color and fragrance of your product. We have access to a wide range of options to meet the look and feel of your brand.

Selling products online and want to ensure they arrive safely to customers?  
We highly recommend you take advantage of our induction sealing service.  
This extra level of protection adds a heat-induced foil liner onto the cap  
so that liquid does not leak.

**Example induction seal**

Didn't find the packaging you want in our catalog? Just let us know the size, style, and color bottle and we can check with our suppliers to see what else is available. Minimums may apply.

Select from a variety of label materials and have your packaging stand out to consumers.  
Below are some of the most common label stocks we work with.

### **Gloss BOPP**

This is a glossy white polypropylene film label. It has a general purpose permanent adhesive that sticks well to a variety of surfaces. It has good durability and is water proof.

### **Clear BOPP**

Clear biaxially oriented polypropylene film with a clear permanent emulsion acrylic adhesive with excellent clarity, good initial tack, and good adhesion to a variety of substrates. Excellent choice when a "no label" look is required.

### **Matte Paper**

A bright white paper label with a matte finish. This label has a general purpose permanent adhesive that sticks well to a variety of surfaces. End uses where you want the subtle beauty of the artwork to come through.

For each product we provide you with starter templates that have dielines, artwork requirements, ingredients, warnings, suggested directions, and ingredients. You may modify the template with your own branding, logo, color, etc.

**CAUTION: EYE IRRITANT**  
Read back panel.  
16 FL. OZ (473 ML)

**DIRECTIONS:**  
1. Move car to a shaded location away from direct sunlight.  
2. Rinse car to remove loose dirt.  
3. Dilute 1 oz. Car Wash Shampoo per gallon of water in bucket.  
4. Wash car with a sponge, microfiber or terry towel.  
5. Rinse car then dry immediately with towel.

**INGREDIENTS:** Filtered water, plant-based surfactants (for cleaning: lauramine oxide, sodium lauryl sulfate & cocamidopropyl betaine), vegetable-glycerine, tetrasodium iminodisuccinate (water-softening agent), sodium citrate (thickener), preservative (less than .05%), fragrance oil blend and colorant.

**CAUTION:** In case of eye contact flush gently and thoroughly with water. Keep out of reach of children.
