Baker Rigging is the home of the only all Electric 60T pick and carry Ormig crane in North America! The Ormig is safe to use indoors in a clean environment - it is completely electric. Zero Emissions.

The Ormig boasts a very tight turning radius that fits in small spaces. The steering radius is as limited as possible because the crane rotates on itself thanks to two slewing bearing units positioned in the rear wheels; the hydro-pneumatic suspensions system assures a perfect distribution of the load on the rear wheels.

Our fork fixture converts the Ormig into a 26T reach lift saving you time and money.

Got heavy equipment? We have the equipment and the expertise to lighten your load!

Baker Rigging offers Machinery Moving, Rigging, Transportation, Packing and Crating Services and Warehouse Storage.

Machinery Moving

Installation, removal, and relocation of your heavy equipment! All types of equipment including medical, electrical, manufacturing, and industrial.

Transportation

We provide the truck, trailer, riggers, forklift and other necessary equipment to help you transport your machinery or heavy equipment. Packing and Crating services are also available.

Utilities

Baker Rigging provides power plant outage support. We also rig transformer components for on-site rebuilding. We can install and remove switchgear, breakers, bushings and other plant equipment.

Warehouse Storage

Dock level and ground level access to secure warehouse storage for your equipment. Short term and long term storage available.

Emergency Services

We offer 24 hour emergency services to get you back up and running! Need a transformer, generator or another piece of necessary equipment replaced or delivered right now? We are here for you!
