### **Who we are (Page 3)**

Independent Power Systems (IPS) is a domestic leader in diesel power generation industry, including Rental, Supply and Maintenance for diesel generators. Company operates kingdom wise and employs around 30 management & technical staff. Company owns around 120 units different sizes with total generating capacity of 80 MW, supplies both on/off grid plants powering sensitive applications in Oil & Gas, Construction, Events, Urban residential areas & Factories.

All aspects of the diesel power generation industry have been brought together in one company; we offer short/long term power rental contracts, Supply & installation projects and Operation & maintenance contracts for your diesel generators fleet. With this approach we are glad to serve any requirements you have related to diesel generators.

At IPS, we work around the clock making sure you get the electricity you need, whenever you need it – all powered by our trade mark passion, unrivalled experience and local knowledge. From urban areas to unique commercial projects, we bring our equipment to any location, from the busiest cities to some of the most remote places in the kingdom.
