Diesel Generators Rental

IPS can offer solutions for rental power needs of all sizes and shapes, from temporary, single-site power, to base load-scale, multi-megawatt power for regional grids. We focus on delivering specifically what each client needs, when they need it and where they need it.

- Our Power generators range in size from 65kVA to 1,400kVA.
- Our portable power generators are quiet with a compact design. They are designed for quick fork-lifting and safe transportation.
- Containerized rental power units are available in individual sizes from 500kVA to 1400kVA and offer unique synchronizing and load-sharing capabilities to feed multi-megawatts loads.

IPS delivers clean, reliable, fuel-efficient gensets whenever and wherever you need them. We're hard at work around the globe providing single-source access to all product and accessory needs – and our experts are with you all the way to help you design a system, deliver equipment, and provide technical support, service, maintenance, and training programs.

WHAT WE DO

DIESEL GENERATORS SUPPLY & INSTALLATION TURNKEY PROJECTS

IPS undertakes the complete engineering for the power project. This includes all aspects for providing reliable diesel generator set, electrical and mechanical works. Adequate provisions are made for ventilations, cooling of engines, fuel supply systems and exhaust systems as per set manufacturer recommendations and ISO requirements.

We are flexible due to the excellent relations with the most reliable engine manufacturers and packagers. We supply sets based on Cummins, Perkins, MTU & Volvo engines plus Stamford, Leroy somer & mecc Alte alternators. We also design the set to match your worst weather conditions

based on CE certified materials, sand storms, high humidity, heavy rains....et

Basics Come First

Plan for the Unexpected

Environmental Consideration
