

I like this for at the bottom of the pages / footer area - It has a nice form, shows trust with me involved and is a good image of me :)

Using icons like this instead of featured images for products could work - saves the design time too - There is not a lot of products - Links, Content, Monthly Packages and each category will have 3 products

I quite like this laptop and table for the header image - Maybe with a [GA screenshot of an up graph](#)

For link building - I like this - or a variation of as a visual representation of a link

This can be a static page outside of the eCommerce system - I will provide payment links when needed

This is a good section to have

---

I like this type of section - we would want to use it in a body of content though, rather than a separate CTA bar - Will be used in Product category content - text blocks

I have bought <https://woocommerce.com/products/storefront-extensions-bundle/>

We have a pricing table in here - I wish to use this on the monthly SEO packages page - I will provide the payment links - Will be PayPal subscriptions outside of the ecommerce system

Testimonial section / CTA bars - can these be "widgetized" so we can add elements where we want them?

CTA bar - Colour strip, Statement text, button to Monthly packages page

Need ability to add to the pages - Especially category pages - We want to make CRO focussed pages
