Can you please make the “What I Do” part static? (for both By Brand and By Craft pages). The words are slower to load when the page loads, but if we can make it part of the background image, it should be static.

When you scroll through the images after click on the tiles below, the window resizes each time. If possible, is there a way to not have them resize each time? Like this?: <https://staceyhan.carbonmade.com/projects/6701630>
If that's not possible, that's ok!
