

## CO-VIDSPEAK

### VIDEO-SUPPORTED REMOTE COMMUNICATION

Combines High Tech Communication Boards and web video conferencing: designed for people who can't speak but still need to emotionally connect with others at a distance.

## EVERYONE DESERVES A VOICE

Co-VidSpeak is a one-on-one video calling platform, where the video feed is surrounded by labeled buttons that will vocalize words and messages.

"We like to set up video calls for clients and their families. But for those clients who don't speak, they could only listen to their families. Co-VidSpeak brought our residents much-needed relief and joy, as they are now able to tell their families they love them and continue to have meaningful conversations."
