Dermatology Education logo suggestions for Design Crowd

Insert Table Graph Text Shape Media Comment

EDUCATION LOGO

Could we try an original version of something along these lines? Dermatology Education replacing existing text.

Could you try something with these elements.

This shaped shield with a book icon in the middle of the shield. In the background, behind the book, a sun icon.

With all of these ideas, the colour schemes do not have to follow what has been provided. Would like to see a range of ideas, colour wise.

Thanks
