

Want the Earth to look very similar to this, not too bold however very noticeable that it is in fact a design of the earth itself.

I want to keep the head of the snake in this design however I want the body to have more realistic scales and more color. The tongue also needs to be colored preferably red or black.

Design Instructions: Need the snake to be wrapped around the earth showing its takeover of the world and its ferocity. Really want the design to look iconic.
