

Chesapeake Career Consulting LLC, services schools, professional associations and community members across 6 states plus Washington DC, as these represent the regional watershed surrounding our shared Chesapeake Bay. We seek to bridge interdisciplinary curriculum to careers involving our youth, as well as support career transitions across changing industry areas. Each consultant is a seasoned professional, with over 20 years of expertise, representing corporate, education, government and non-profit leadership, with share focus on emerging professions in "sustainability".

CHESAPEAKE HORIZONS

Environmental Literacy: - School & Community Gardens are ideal for learning about ecosystems! Customized, hands-on, experiential learning workshops led by UMD Master Gardener delivering "Grow it/ Eat it" curriculum. Students learn ecosystem components vital to growing our food, with relationship to land, water, plants, pollinators, wildlife and "Bay Wise" conservation of our shared Chesapeake Bay home.

Service Learning - Next Generation Professionals are Rising! We offer customized workshops to empower our youth, as they bring creative innovation to local community projects, while fulfilling curriculum requirements for service learning or internships that build professional skills. Applying the CareerEcologia™ framework, students develop individualized profiles, practice communication skills, design projects in collaboration with partners in the community who may serve as mentors. Adapting to varied learning styles or interests, students may share stories of accomplishment through creative media including videos, written articles, podcast interviews or exhibited posters. Students will have opportunity to develop professional resumes, online portfolios and/or have their accomplishments featured in our CareerEcologia Community Blog!

C3 - Curriculum, Community, Careers

Workshops in person and/or Webinars to expand access, are customized for varied curricular disciplines to explore how these are applied in contemporary professions. Thinking Globally, Acting Locally, participants explore how organizations and communities are dealing with intersecting issues of **Environment, Economy and Equity (3 E's)** within the framework of Global Sustainable Development Goals. Students and Professionals have opportunity to be featured in our Talent Gallery to elevate their accomplishments and network with employers seeking talent on sustainable solutions innovation!
