Document Automation Services

At Document Options, we deliver award-winning document automation services, from business process optimization and document management to data capture and document scanning. We specialize in transforming your most labour-intensive workflows into cost-effective automated solutions, helping you save money, enhance efficiency, and grow your business.

- Document Scanning**
Digitise your physical files with our high-volume document scanning services. We use advanced technology to ensure precision and efficiency in converting paper documents, files, and media into digital formats such as PDF, making information instantly accessible and easy to manage.
- Document Processing**
Streamline operations with customised document processing systems. Our automation solutions replace manual workflows, reduce human error, and optimise paper-based processes, saving time and cutting costs.
- Box Storage**
Secure your critical records with our document storage services. We provide highly regulated storage facilities and robust cloud platforms, ensuring reliable retention of both physical and digital records for your peace of mind.
- Secure Document Destruction**
Dispose of obsolete or sensitive documents securely with our certified destruction services. Our compliant processes ensure that your materials are destroyed in line with stringent regulatory requirements.
- Document Management Systems**
Centralise and streamline your information with our feature-rich document management software. Consolidate documents from across your organization into a single, searchable repository, enhancing accessibility and productivity.
- Digital Mailroom**
Future-proof your business with our digital mailroom solutions. We digitise incoming mail and automate workflows, replacing outdated paper-based systems with efficient, modern digital processes.
- Microfilm Digitisation**
Preserve and access historical data with our expert microfilm digitisation services. We convert microfilm records into searchable, high-quality digital formats, ensuring the longevity and usability of your archives.
- Workflow Systems**
Transform your operations with our tailored workflow systems. These solutions automate tasks, reduce manual intervention, and enable seamless information flow across your organisation, enhancing collaboration and efficiency.
- Large Format Scanning**
Our specialised large-format scanning services digitise oversized materials such as blueprints, maps, and posters with precision and clarity, ensuring no detail is lost.
