

Embedded Payments Today

Verify-to-Pay helps avoid fraud through modern, more secure payments and better recipient verification. Supporting payment choice includes methods that are immediate and ones that can be scheduled. All recipient information is maintained by the Verify-to-Pay platform.

VERIFY-TO-PAY

Paying by check isn't easier and definitely not safe

Avoid fraud by not paying with checks. Checks are expensive and a fraud target because they are easily lost, stolen, or modified. Modern electronic payments enable more remittance information than a check which travels along with the payment.

Electronic payments through Verify-to-Pay offer:

- ✓ Verify Recipients
- ✓ Automate Recurring Payments
- ✓ Enterprise-class instant payouts
- ✓ Lower Payout Fraud
- ✓ Just in time Funding
- ✓ Lower Managing Expenses
- ✓ Embed Payments
- ✓ Schedule Payments
- ✓ Increase Cash Flow
