LOGOTYPE USAGE

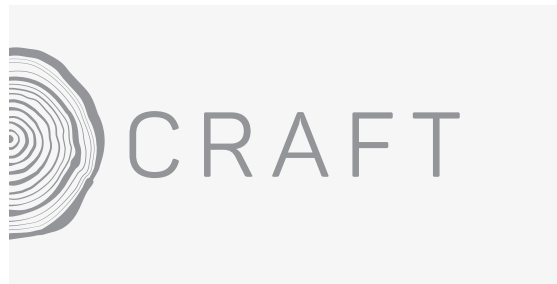

Because of the design of the logo - specifically the midpoint cut of the rings - care must be taken in its use. Where possible, allow the cut of the rings to align tightly against the right margin.

It is acceptable to reverse the ring design for left-handed use; the distance between the wordmark and the icon must stay the same.

The size of the ring icon is variable - you may increase its size relative to the wordmark if necessary, so that the rings ajoin to an edge. Wherever possible, do not allow the logomark to float in space.

LOGOTYPE STRUCTURE

The CRAFT logomark is designed according to a predetermined set of proportions. The letter C of CRAFT, when sliced in half, functions as an appropriate measuring device.

The letter C also offers a guideline for clear space. To protect the integrity and look of the logomark, don't let any other visual elements inside the clear space zone.

At sizes 40mm and below, the nuances of the rings can get lost. A simplified version exists for these use cases.
