PATHWAY 2 CAREERS

When education becomes relevant, learners fully engage.

About Pathway2Careers

Pathway2Careers™ (P2C) is solving some of the biggest challenges in education, helping learners and teachers make daily connections between what they are doing now and what they'll do later in life. P2C delivers comprehensive career-connected learning solutions to guide students to future success.

CAREER-CONNECTED LEARNING SUITE

P2C Labor Market Navigator provides important insights into job opportunities and current hiring trends in local industries, allowing educators to fine-tune their curriculum to fit the needs of their students.

P2C Math is a comprehensive curriculum that introduces foundational math concepts in the context of high-value careers to motivate students. Your answer to "When will I ever need to know this in the real world?"

P2C Career Explorer takes a unique approach to career exploration. Beyond career tools, the guided curriculum introduces age-appropriate career readiness content available for any subject area.

PROFESSIONAL DEVELOPMENT

The **P2C Professional Development** team provides prescriptive, tailored learning experiences to meet the needs of our participants, including ongoing support via follow-up virtual sessions, collaborative online learning communities, and access to online courses reflecting the latest research within the industry.

SCHOOL SERVICES & INNOVATION

Career readiness initiatives need guidance and implementation support to ensure students are prepared for jobs in your community. We specialize in providing Technical Assistance by successfully implementing Early College High Schools, Coaching Expertise, and Communities of Best Practice.

PATHWAY 2 CAREERS

When education becomes relevant, learners fully engage.

For nearly a decade, P2C has been at the forefront of **career-connected learning** with ready-to-implement solutions that work. Our products are supported by a career readiness model that increases student motivation and performance, while our research and support services can alter policy and transform communities.

LABOR MARKET NAVIGATOR

P2C Labor Market Navigator is a customized dashboard with social, economic, and demographic data within a school district or region. The P2C LMN equips educators with information to establish new community partnerships, provide personalized pathways for students to explore their passions, bridge the gap between education and the workplace, and strengthen and evaluate CTE programs.

P2C LMN is the fuel upon which P2C Math and P2C Career Explorer operate and sets P2C apart from other career exploration applications.

MATH

P2C Math covers four full years of math instruction: four vertically aligned courses—Pre-Algebra, Algebra I, Geometry, and Algebra II—connecting learning with authentic and meaningful situations and allowing students to see how math applies to everyday tasks in various careers. P2C Math was developed through data-driven and evidence-based research using principles of Understanding by Design and Universal Design of Learning, including engagement, representation, action & expression. Beginning, middle, and end-of-year summative assessments are included that report Quantile® measures from MetaMetrics®

CAREER EXPLORER

P2C Career Explorer is a unique approach to career exploration for grades 6-12. The career exploration lessons are designed to complement core subject classes, meeting learning objectives and standards for both subjects and allowing the teachers to use these as supplemental lessons that include research assignments, interactive problem-solving, career storytelling, worksite simulations, and games. Beyond the curriculum, students have access to career tools and their own career page for exploration and discovery.
