

### The Company

The name of my company is Proctor Inspection Services, LLC. I want to use Proctor as the main part of my logo because if you look it up in the dictionary it means “a person who monitors students during an examination, or serve as a proctor.” My business focuses on weld inspection/testing so I feel fortunate enough to be able to use my name. Ultrasonic testing is probably the most catchy of the methods I use to inspect welds. People for some reason are intrigued by it. I introduce sound waves into the part being inspected and read the signals on the screen to tell if there is something trapped in the weld that could cause it to fail. Some of the screen shots show what the screen looks like to give you a better idea. The colors represent the intensity of the sound being reflected back to me and how big the flaw is.

I do like the colors and the shape of the screen. I think it would be nice on the front of the card. I want to used raised lettering and printing on the front of the card maybe. One of the files I've sent you is something I did on Microsoft paint in a couple of minutes as my initial idea a while ago. I was also thinking about doing a fridge magnet to pass out along with my business card. So something that people would want to put up at work as a reminder of my company.

### The Front

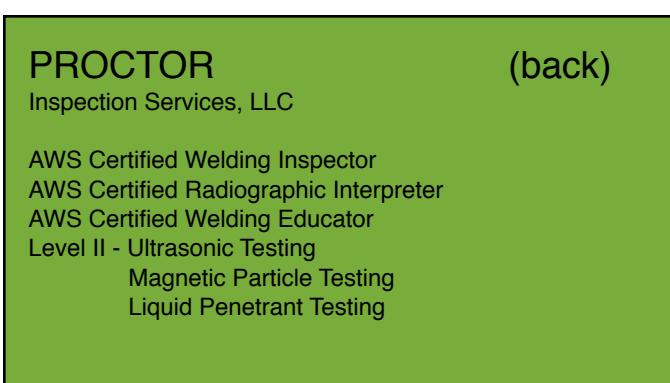

I would like Proctor or PROCTOR as the focal point with Inspection Services, LLC in smaller print below. MY name, phone and email also.

### The

### Back

I think it would be nice to have a two sided business card because I have a lot of credentials that people in this business respect and I want to include them. Sort of like a brief resume on the back. I don't want to use raised lettering on the back of the card to keep costs down and I think its unnecessary.

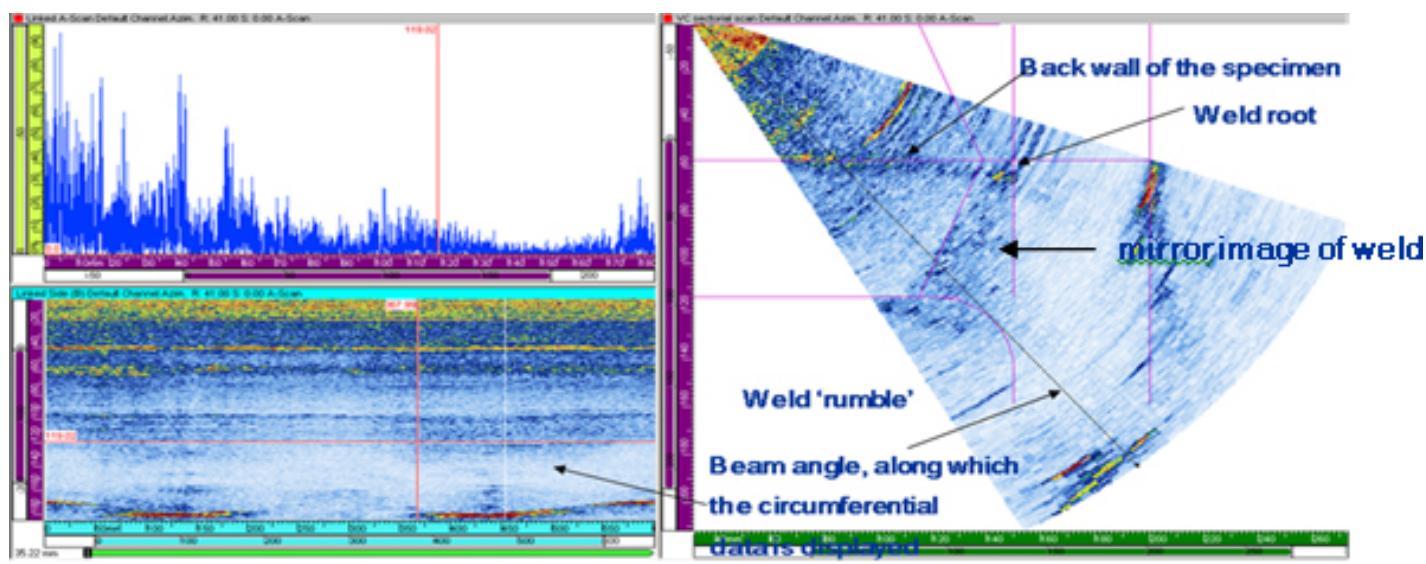

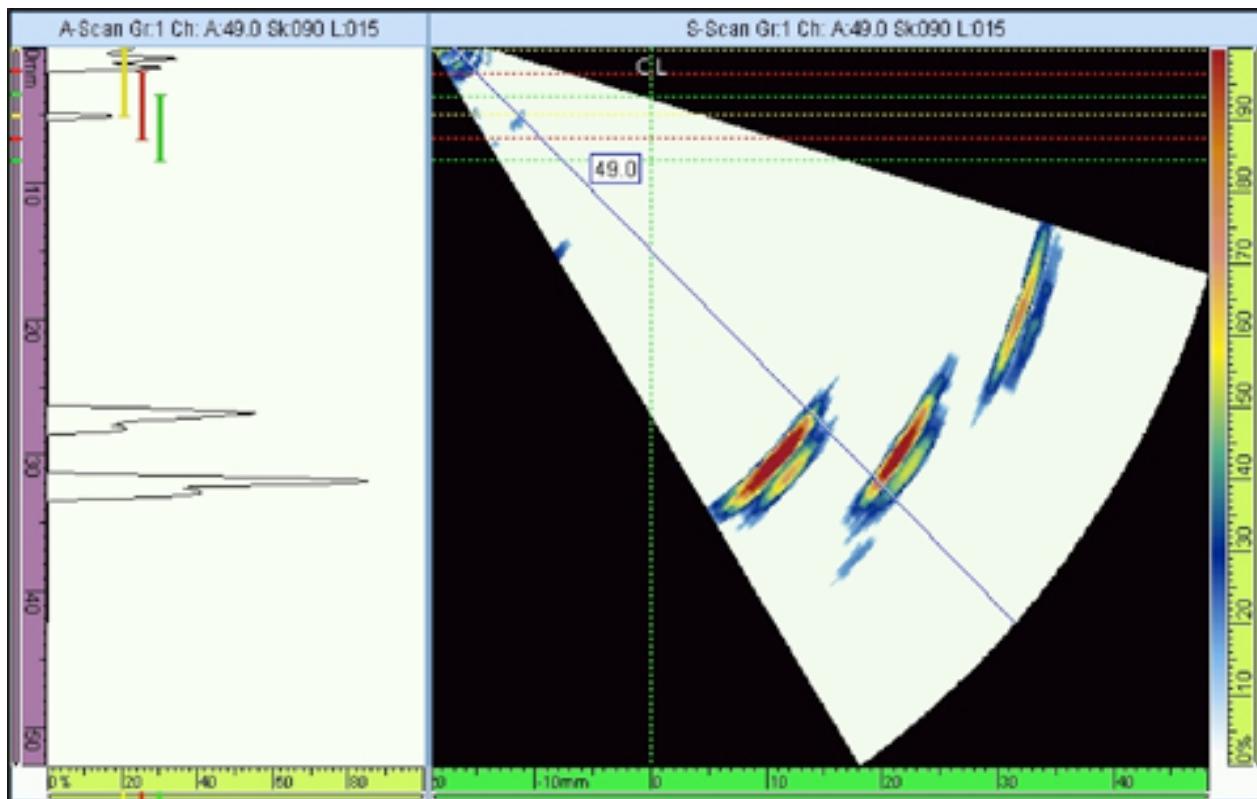

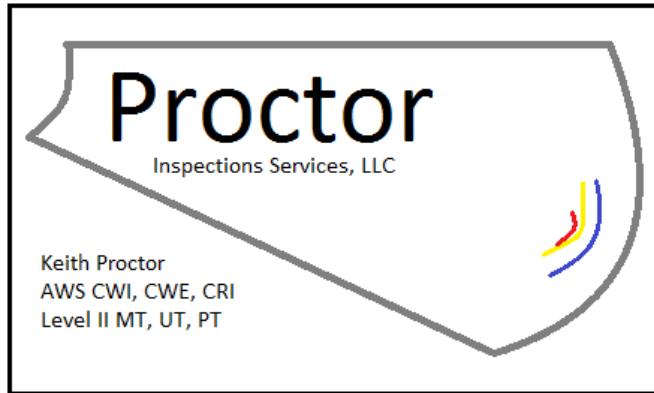

or.....

AWS - CWI  
AWS - CWE  
AWS - CRI  
Level II UT, MT, PT

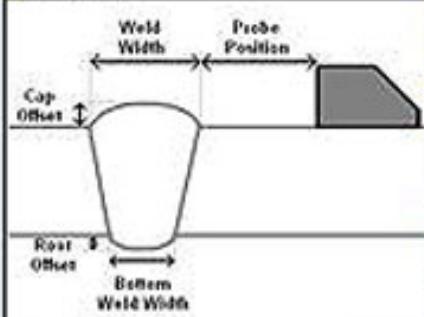

abbreviations are understood also by people in the business if space is at a premium.

The following are just some image ideas?? You guys and gals have the creative control though, the professionals. All the font, colors, size, etc. is up to you. Thanks for reading.

This was my initial idea I drew on Microsoft Paint?? I kind of like the concept.

### Weld Parameters

	<table border="1"><tr><td>1</td><td>Probe Position 25 mm</td><td></td><td></td></tr><tr><td>2</td><td>Weld Width 20 mm</td><td></td><td></td></tr><tr><td>3.5</td><td>Cap Offset 1.5 mm</td><td></td><td></td></tr><tr><td>4</td><td>Bottom Weld Width 11 mm</td><td></td><td></td></tr><tr><td>5.5</td><td>Root Offset 1.5 mm</td><td></td><td></td></tr></table>	1	Probe Position 25 mm			2	Weld Width 20 mm			3.5	Cap Offset 1.5 mm			4	Bottom Weld Width 11 mm			5.5	Root Offset 1.5 mm		
1	Probe Position 25 mm																				
2	Weld Width 20 mm																				
3.5	Cap Offset 1.5 mm																				
4	Bottom Weld Width 11 mm																				
5.5	Root Offset 1.5 mm
