

Axis TURBO-X Nano Drone™

The World's Smallest and Fastest Quadcopter™

Measuring just 42mm x 42mm the Axis Drones™ New TURBO-X™ Nano Drone is the World's Smallest Quadcopter™

With speeds reaching over 30 mph the TURBO-X™ is also the World's Fastest Nano Drone™

3 Speed Settings: Low Speed does not mean slow, if you are a beginner you may want to start with the Axis Nano Drone for Beginners™ to master the basic flight functions first. Medium Speed is not recommended for indoor use and High Speed is definitely not for the faint of heart or for indoor use. DO NOT FLY INTO PEOPLE, ANIMALS or PROPERTY INJURY MAY RESULT.

6-Axis Gyro Stabilization: Your TURBO-X™ is capable of amazing mid-air maneuvers with extremely responsive handling thanks to the stabilizer technology upgrades pre-installed. You can bank hard and fast in any direction and your TURBO-X™ will automatically return to center.

2.4 GHZ Controller: This is not an infrared toy you will find in your local drugstore, this TURBO-X™ features a 4-channel, 2.4 GHZ system that creates a unique connection with your specific drone to minimize interference, allow many drones to operate in the same area and maximize flight distance.

3D Rolls N Flips: One of the best features that will make you look like an ace pilot in front of your friends and family is the Pre-programmed 360 degree 3D Rolls N Flips Algorithm. Simply press IN the Right Joystick and you can activate the 3D Rolls N Flips program, then simply push the Right Joystick in any of the 4 directions you want the TURBO-X™ to Flip or Roll!

Flight and Charge Times: 20 minutes to fully charge via USB Cable provides 5-7 Minutes of High-Speed Flight Time and Adrenaline Pumping Stunts and Tricks.

SPECS:

- **World's Smallest Quadcopter™ - 42mm x 42mm**
- **World's Fastest Nano Drone™ - Speeds Over 30 MPH!**
- **3.7 Volt, 100MAH Lithium Ion Rechargeable Battery**
- **5-7 Minute Flight Time Per 20 Minute Charge via USB**
- **3-Speeds Settings**
- **6-Axis Stabilization for Precision Flight**
- **2.4 GHZ, 4-Channel Controller System**

IN THE BOX:

- **One Axis TURBO-X Nano Drone™**
- **Installed 3.7V, 100 MAH Lithium Ion Battery**
- **One USB Charger Cable**

- **One 2.4 GHZ, 4-Channel Controller**
- **One Set of Replacement Blades**
