

The title for the book is "Creating College Lists: Your Guide to Using College Websites to Pay Less for a Better Education"

Author is Michelle Kretzschmar

Title must legible for Kindle store. I only need to front, no back or spine. The cover should be optimized to display on Amazon. Image size should be 1880x2500.

This book isn't about how to apply to college or which classes to take or how to score higher on the SAT. It's only focus is on how to use college websites to create a better college list. This is part of my general approach for families to use information important to their situation to find affordable colleges. I've attached a file with some covers from the category I like. I'm pretty flexible regarding colors, fonts, etc.

My website is DIYCollegerankings.com.
