# Directions:

- Loosen wing-nut and attach the AxisBall to the Putter
- Align the center of the AxisBall with the center of the Putter using one of the AxisBall reference lines
- Tighten the wing-nut until the device is snug against the putter \*Make sure not to over-tighten
- Find a flat area on a putting green in relation to a hole
- Use the rounded surface to determine where the ball is making contact in relation to the putters sweet spot
- Remove AxisBall when dialed in and sinking putts
