modern sustainable furniture

We love to mix materials.

The Heartland Collection is a tribute to the 500 million cubic metres of Lodgepole Pine that have been killed by the Mountain Pine Beetle (MPB) in the Interior of British Columbia.

The Heartland Collection celebrates the complexities of nature by juxtaposing the non-linear “blue stain” ribbon that permeates each unique piece of wood with the clean lines and transparency of the synthetic-based Lucite.

Heartland

by Peregrine

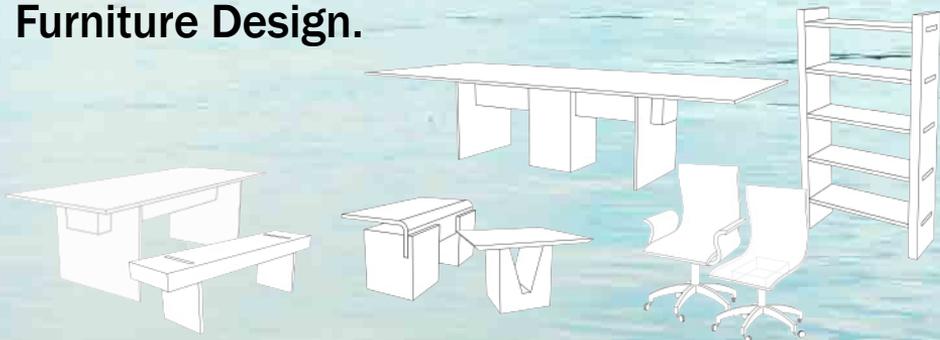

Peregrine Custom Plastics & Acrylics, a Vancouver B.C. based company, is proud to launch the brand new Heartland Furniture Collection.

From tables, chairs and benches, to corporate furniture, to shelves and coffee tables this unique suite of furniture is uniquely handsome and majestic. Each piece carries clean, rectangular lines and edges. Each remains faithful to the urban design appeal yet showcases the natural warmth and softness of the wood hovering in the face of gravity.

In keeping with Peregrine's enduring philosophy, each piece of furniture is crafted from museum-quality materials - selected, fabricated and assembled by hand right here in B.C. Peregrine is the foremost manufacturer of high-end, custom, build-to-order acrylic and lucite furniture for both residential and commercial customers since 1978. The Heartland Collection is the first to emerge from their new in-house designer.

Modern Sustainable Furniture Design.

Custom sizes & designs made to order. Live edge milled MPB also available.
Heartland Prototype Table: Museum Quality, High-Transmission, 1" 36"x72" Lucite; 12"x12"x55" MPB Lodgepole Pine
